

# PROJECT PROFILE

Justin Sienna Locker Rooms | Napa, CA

## Ventilation Solution

Nova C24 with DX Coil

## Project Requirement

- > Low Profile
- > VRV Integration
- > High Efficiency Solution
- > Custom Configuration
- > Improved Occupant IAQ

## Project Type

Retrofit

## Manufacturer's Rep

Norman S. Wright

## Solution

Oxygen8's Nova ERV integrates with Daikin VRV technology for ventilation, heating, and cooling of the locker rooms, coaches' offices, and film room of the Justin Sienna Locker Room. Due to the tight space constraints of this project, the Nova C24 unit was installed on its side and all Daikin components were field installed.
